| Time: 8:30am – 12:30pm | Time: 1:30pm – 3:30pm | Time: 9:00am – 12:00pm | Time: 1:00pm – 4:00pm |
| Description: This class will assist the water and wastewater system operator in outlining the specific points in developing the draft of the operations and maintenance manual. Step by step, each attendee will create their draft as it relates to their utility system during class, completing the document with a series of e-files at their home location. | Description: This course is designed to provide you with some basic knowledge of leak detection practices & correlation methods. Students will be instructed in the basics and background theory of leak detection to better utilize basic correlation techniques for distribution & collection systems. Participants will learn various methods available to identify & find leaks. | Description: Development of a higher awareness level of confined space/lock out tag out in the workplace and applying theory to real situations. Discuss the OAR-437 and instruction on how to comply. | Description: This class will highlight elements of the rule CFR 1910.1200, employees understanding key features of the written program, safety data sheets, labeling requirements including new global harmonization features. Attendees will gain knowledge of chemical characteristics, the effects to exposure and how to properly use personal protective equipment. |
